OASIS MONSOON

car wash system

We designed the **MONSOON** to provide you with the least amount of moving parts and your customers with the best possible wash. Any type of operation will benefit from this unique, adjustable, high-pressure TOUCH FREE wash!

PRECISION

Our gear drive system has machine tool precision.

There is no need to worry about low air or flat tires causing the machine to slip or skew. With the Oasis unique drive, every movement in the bay is exact.

SAFETY

From the moment money is inserted and wash is selected, the Monsoon's built-in safety features work to protect your customers as well as the system.

SPEED

The faster you can get the cars through the bay, the quicker you head for the bank! The Monsoon can wash at a rate of up to 30 cars per hour.

RELIABILITY

Hydraulically powered, the Monsoon drive system is so reliable we offer a 5 YEAR WARRANTY on the drive – a feature that is unmatched in the industry!

SIMPLICITY

The Monsoon's simple design calls for only two fluid motions, thereby adding to its longevity and your income.

VERSATILITY

The Monsoon is computer controlled and gives you, the operator, the versatility to adjust to the smallest cars or the longest pickups and enables you to select the wash cycles just right for each location. Oasis processors are supplied by the world's most respected name in industrial controls.

CLEANING

Our unique rotating wand, on-board rocker panel blasters and underbody wash allow for excellent chemical application, which produces cleaner cars. With this unique design, cleaning those hard-to-reach places such as fender wells is possible.

CONSTRUCTION

The Monsoon's wall-mounted frame helps protect the unit from damage by water, chemicals and grime through its elevated carriage system.

The Monsoon is also more visually appealing than ground-mounted machines. The wall-mounted frame provides an open, spacious bay, which is appealing to customers.

MO
